

# Meeting Working Bee 10 January 2015

It was an overcast day although though the predicted rain did not eventuate.

After the meeting the men tried out the spray equipment for painting the huts and shed on a special working bee scheduled for Friday 16 January.

When most of the members went with Jasper to look at the tall trees Glen stayed behind and finished using up the paint on the Laundry Hut

The Counter Balance on the doors of the kiln was checked.

The tall trees were an impressive sight. At the site Jasper spoke about the importance of looking after those trees for our future generations. Thoughts were discussed and questions asked.

After returning to Kurth Kiln we saw a Koala sitting on a tree branch opposite the Kiln site.
