

# Kurth Kiln Meeting and Working Bee

13 January 2018

Following the meeting, rubbish from the felled tree was cleaned up, also the track behind the shed leading to the toilets was widened and the dead ferns cut back at the waterwheel and on the embankment leading up to the caretakers compound. Glen's trailer was full of wood and ferns.

The track is again nice and wide

Meredith was busy cutting back the ferns. Val and Mike and Glen loaded it all on the trailer and Craig and Bev cleaned up after them. Jasper fixed

Alfred removed the bottles someone had put on the kiln open door

the problem with the removable bollard, which had loose stones washed into it, then he cleaned out the guttering with a long hooked stick. All in all a very effective day.
