

# AGM, Monthly Meeting and Working Bee

## Saturday 14 October 2017

12 members, including Joe's son, attended the meetings and working bee.

At the AGM, after reading the annual report, elections were held and all positions filled again. This was followed by the monthly October meeting, where the Festival was discussed.

Then, one group went to work removing the dead shrub at the Caretakers Compound, one person collected rubbish in the picnic area, another checked the solar panels.

One group went to the Scout Loop Track camping area to remove the tree guards from the re-vegetated plants. The

seedlings were planted with a DEPI Grant in 2015 with the help of the Cockatoo and Hoddles Creek students on 12 selected areas between the newly created Camp Sites along Scout Loop Track. Many of the seedlings had already grown into big plants.

The garden in the Caretakers Cottage looks well cared for again.
