

# Meeting and Working Bee

Saturday 9 March 2016

After the meeting the men discussed the festival plan

Some of the ladies cleaned the six interpretation panels along the Thornton and Waterchannel Tracks. One of the panels had been broken off. They met a walker checking out the tracks and saw an interesting mushroom on the Thornton Track.

Carmel brought the little wallaby she is currently looking after. Rick brought his new Drone, which took a video from high up of the Kurth Kiln area.
